Procedure of The Month VariLite

Quick & Effective Treatment for Vascular and Pigmented Lesions.

What to expect during and after a treatment

- Treatment varies depending on patient characteristics and that are being treated. Each patient will have a individual treatment plan recommended.
- Treatment sessions generally last 15-30 minutes.
- The nurse will use a pen-like handpiece to direct a beam of laser light onto the treatment area.
- Some patients report feeling a slight stinging sensation during treatment so a cooling gel may be used to help alleviate the discomfort.
- Some redness may occur immediately following treatment, however it should subside with several hours.
- Some swelling may also be experienced and will go away in 1-2 days.
- Final results should be evident 10-14 days after treatment for vascular lesions and 2-3 weeks after treatment for pigmented

Product of The Month Sunscreen

Sunscreen is necessary item to have in warm weather. Using sunscreen daily can help prevent many skin related cancers. Sunscreen is also one of the best products you can use for Anti-aging.

In the Cosmetic Center we carry several types of sunscreens to fit every skin type.

- SkinCeuticals SPF 20-45
- Blue Lizard SPF 30
- Vanicream SPF 60
- Elta MD SPF 30-50

We also carry hats and sunglasses to help protect you from the sun. If you would like us to recommend a sunscreen for you, please come see us in the Cosmetic Center.
