S.P.F.

Sun Protection Factor

The numerical scale to measure the degree of protection provided by sunscreens.

- We recommend using sunscreens SPF 30 or higher that contain zinc oxide and/or
 - titanium dioxide.
- White tee shirts only provide an SPF of five.
- The average adult should apply enough sunscreen to fill a shot glass.
- Sunscreen should be re-applied at least every two hours.

In the Cosmetic Center, we offer a wide array of sunscreens for every skin type.

Remember Mother's Day is May 9th & Nurses Day is May 12th
We will be closed May 31st for Memorial Day

Procedure of the Month

Cosmetic Dermal Fillers

Cosmetic dermal fillers are made up of hyaluronic acid and calcium hydroxylapatite, and other substances. Juvederm®, Restylane®, and Radiesse® are brand names of dermal fillers that we utilize at Dermatology Associates of Kingsport.

These products are similar to substances found in the body naturally. Dermal fillers are FDA approved to safely and effectively treat the lines around the mouth, sometimes called “the parentheses.” The procedure involves several injections into the effected area and requires little to no down time. The newest products we carry are Juvederm® Ultra XC and Juvederm® Ultra Plus XC, which contains the numbing agent xylocaine. For more information and to see if a cosmetic dermal filler is right for you, call and schedule your free consultation.

423-246-4961 or 800-445-7274 option 5

Product of the Month

Sunforgettable SPF 30 is a lightweight mineral powder with a barely-there feel that provides a safe, non-irritating, instant UVA and UVB sun protection. The self-dispensing powder brush makes this sheer formula easy to apply and reapply throughout the day.
